

# CERTIFICATE

**Certificate No:**

**Process:**

**Date:**

**Job Reference / Manifest No:**

**Customer:**

Certification is provided that the media content / equipment of your consignment has been sanitised / destroyed using the Australian Government Department of Defence Information Security Manual (ISM) standard and the asset media content has been sanitised in accordance with the Protective Security Policy Framework (PSPF) as outlined in the manual.

Certification also provides that the material was processed for recycling in strict adherence with Reuse-RecycleIT's Environmental Management System (EMS) ISO 14001:2015, and in compliance with Federal, State and Local regulations (including the Recycling Industry Operating Standard (RIOS); the International Basel Convention on the Control of Trans Boundary Movements of Hazardous Wastes and their Disposal; Waste Electrical and Electronic Equipment Directive (WEEE Directive), and Australian Product Stewardship 2011) as 'World's Best Practice'.

This certification demonstrates a commitment to the environment by your company and Reuse-RecycleIT, and ensures safety in a recycling practice that such processing of electronic IT equipment requires.
